

Aluminium & Zinc Anode

YUXI marine Al&Zn anodes are normally used on small vessels and other restricted locations where bigger anode cannot apply. Typically application of this pressure die casting anodes are commercial / pleasure craft, pylons, cary, lobster, buoys, sea chests and crab pots.

YUXI anodes are produced from high purity base materials and designed for optimum performance under various environment. We manufacture Al&Zn anode for cathodic protection in many applications, such as ship hull, ballast tank, pile, piers, offshore platform, etc.

APPLICATION

- ▶ Engine protection
- ▶ Plumbing protection
- ▶ Appliance housing parts
- ▶ Electric motor housings
- ▶ Hand and power tool components

FEATURES

- ▶ High efficiency
- ▶ Compact crystal structure
- ▶ Smooth surface
- ▶ High strength
- ▶ Accurate dimension
- ▶ Easy installation

SPECIFICATIONS

Standard Alloy (Max.)	Zinc	Indium	Cadmium	Silicon	Iron	Copper	Others	Aluminum
Aluminum Anode	2.0-6.0%	0.01-0.02%	/	0.08-0.2%	0.13%	0.006%	0.1%	remainder
Zinc Anode	remainder	/	0.02-0.07%	/	0.005%	0.005%	0.1%	0.1-0.5%

- Other anode size and composition can be customized.
